

**PROCESS COMPUTER
TECHNOLOGY, INC.**

For all your Custom Control Panel and Integration needs

**PROCESS
COMPUTER
TECHNOLOGY
INCORPORATED,**

or (PCT, Inc.), is
dedicated to providing
a full range of services for
Factory Automation and
Process Control.

PCT, Inc. specializes in
Programmable Logic
Controller (PLC) Systems fabrication
and integration as well as many other
control system applications.

PCT, INC. COMPANY HISTORY:

Process Computer Technology (PCT) is an innovative forward-thinking company with a foundation of experience that spans over a century. PCT was originally incorporated in 1992 as a means to supply control systems to the industry. The purpose of PCT is grounded in industry and our knowledge and experience is dynamic, while providing flexibility and innovation. We cater to a wide variety of industries including general manufacturing, food, textiles, OEM, petrochemicals, and pulp and paper. PCT is known for its “small company” roots.

PCT is dedicated and vested in supporting our customers to become more productive and profitable by providing engineered solutions for industrial automation and process control. PCT can supply a complete turnkey system from conception through sustainment and modification as denoted by the customer. The dedicated professionals at PCT understand there is more to designing and engineering a control system than

just the process. Our engineers work diligently to take into account all of the various aspects of your operation in efforts to recommend the appropriate hardware thus, meeting your needs in a timely, efficient, and cost effective manner. In designing a system, we account for safety, regular maintenance, and ease of use; providing you with the best possible value in your systems investment.

Our commitment to our products and services does not stop with delivery and installation; we can also supply field modifications, installation assistance, and start-up assistance.

In today's competitive and fluctuating economy, support and automation systems, when coupled with operational fidelity is more critical than ever. While our engineering services can help optimize your application or project. Contact us to find out how we can assist you!

PCT SERVICES:

- Panel Fabrication
- PLC Programming
- Startup Assistance
- AutoCAD Drawings
- Installation on skid
- Helping Customer's fulfill their needs

PCT'S CUSTOM PANELS

CUSTOM PANEL FABRICATION

PCT will Fabricate Control Panels and Racks to your Requirements

- Panel and Rack Specification
- Panel Layout and Design
- NEMA 7 Explosion Proof Panels
- NFPA 496 Purged Enclosures
- Certifications Available:
 - UL580A (Industrial Control Panels)
 - UL698A (Intrinsically Safe)
 - UL NNNY (Hazardous Locations)
 - ATEX/IECEX
 - ABS (American Bureau of Shipping)
 - DNV GL (Det Norske Veritas)
- Schematics and Documentation
- Material Appropriation
- Control Panels
- Marshaling Panels
- Control Racks
- Junction Boxes
- Wiring 100% Tested Point to Point for Accuracy

OTHER SERVICES:

- Systems Integration and Interfacing
- Engineering & Design
- Service & Support

What we do best!! PCT combines the hardware and software of multiple manufacturers into one seamless system.

- Programmable Logic Controllers (PLC)
- Human/Man Machine Interfaces (HMI/MMI)
- System Specification and Definition
- Programming and Configuration
- System Simulation and Training
- Custom Panel Design and Fabrication
- Commissioning Startup

CUSTOM PANEL FABRICATION

- Allen Bradley
- Rockwell Software (Allen Bradley)
- Modicon
- Siemens
- GE
- PLC Direct
- Eaton/Cutler Hammer
- SQD Telemecanique
- Honeywell
- Emerson
